

WITLOFT®

THE STORY

I started WITLOFT in our little garden shed in Amsterdam. That time I followed a woodworking course as a hobby, at which I wore one of their old welding aprons for protection. As soon as I put on that apron I got into a work mode, I felt motivated and passionate. But I couldn't help thinking, this apron can be so much better, more beautiful and more functional. So I went looking for a leather apron, but I couldn't find one. That's how I started WITLOFT in 2014.

I made the first WITLOFT apron out of a rough piece of leather, which was great for personal use. I went on to design, fine-tune and produce the WITLOFT brand. Since then WITLOFT evolved into a great collection of not only aprons, but also other leather items like knife rolls, placemats and bags.

Frank

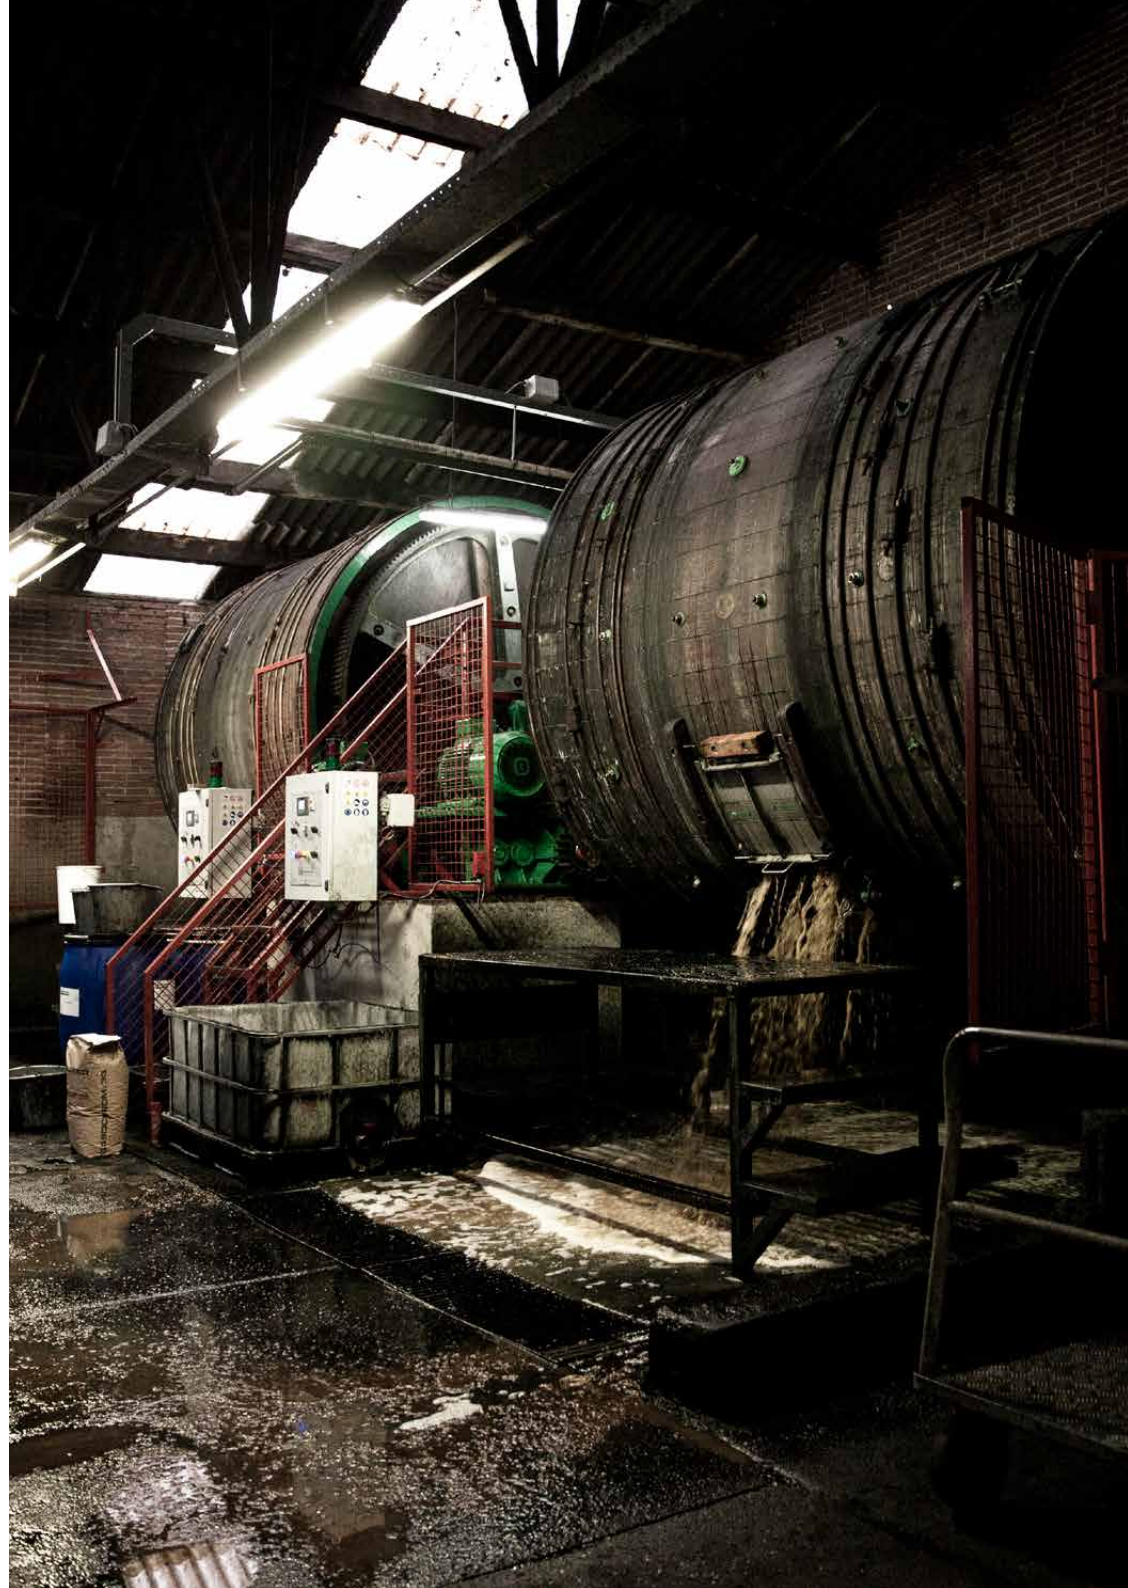

DUTCH CRAFTSMANSHIP

As we return to the basics of handcrafted workmanship WITLOFT brings you handmade leather aprons. Whether you are king of the grill, chef of the house, a professional barista or just like to get your hands dirty; WITLOFT aprons are multi-usable and for anyone who has a passion for handcrafted and artisanal style.

THE COLLECTION

The WITLOFT collection is made of high quality tanned leather. The collection is handmade with great care, making each product unique. As the leather lives and breathes, our products get more beautiful over time with using it.

UNIQUE CHARACTERISTICS

Witloft developed a special and unique coating which is used on most of our aprons. It protects the leather against stains, dirt and even the first scratches. It also makes food or dirt easy to wipe off with a damp cloth. The coating makes the leather a bit stiff in the beginning, but will quickly soften with use. The Witloft apron is made to last and will take on its own unique characteristics over time. The aprons are good for use in a heated environment such as BBQ or grill and will protect you.

Our Craft Collection is made of the same leather, but is a bit softer. This leather has got a more rustic look because of the open structure. Please note that this range is a little less protected against dirt and stains because of the cracks in the upper layer. It is still made to last of course, but the dirt can find its way a little better through the open structure. For stronger protection we recommend to spray this quality with suede spray.

When you're not using your apron, hang it or roll it, don't fold to ensure no lines or cracks will appear in the finish.

COLLECTION —————
